2017-11-18

Agenda

- Recent event
 - 156th Tokyo Debian Meeting
 - share prework
 - seminar
 - re-think Debian release cycle
 - Ask Me Anything and discussion
 - Hack Time
- 

Event Report

156th Tokyo Debian Meeting

- Date:2017-10-21, Venue: Asahi Net, Inc.
- The participant of the event are 5 people.
- Seminar: How to caff and mail-transport-agent
(yy-y-ja-jp)

prework

- ① HackMD をインストールします
- ② Which do you prefer community management or development? How long can you use time for community activity in a day or a week?

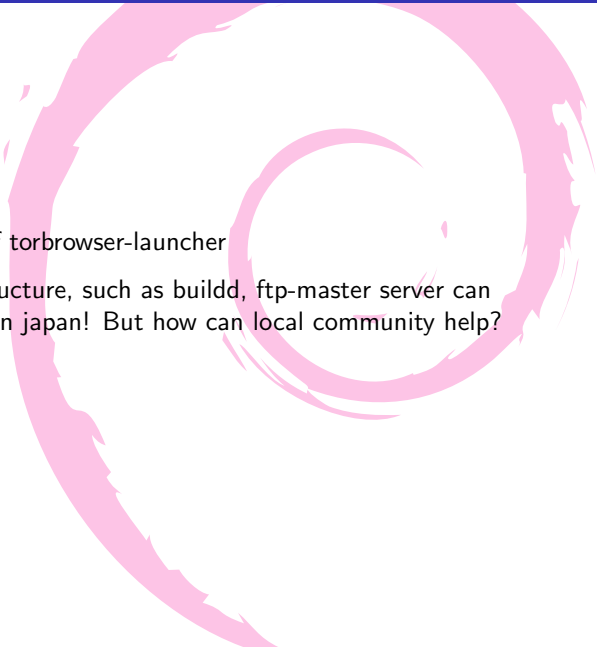

- 
- ① セッションのみですが、参加させていただきましたら幸いです。
 - ② Good to see you again ;)

- ① cabal-debian の proposed-update への upload 準備
- ② (thinking...)

- 1 Open source developer
- 2 How is the Debian release model experience. Any feedback or key thing to share for other software.

- ① パッケージ更新, DDTSS
- ② Outreach – are there any ideas for women and young people to attract Debian?
- ③ init systems – I use sysvinit instead of systemd. I feel some DDs have some intention to make developers/users uncomfortable who support other init systems than systemd. In my opinion it's not a good idea for developers' or users' diversity and universality. Around the GR period some DDs have left Debian. I think it's unfortunate. What do you think about this?

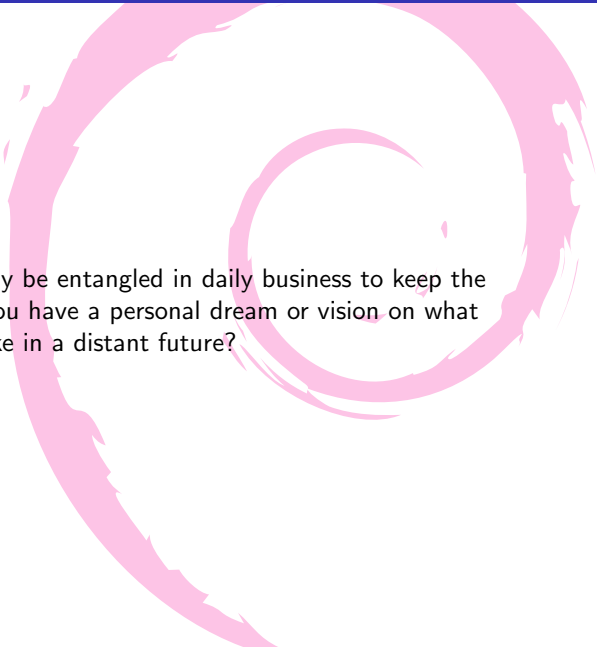

Roger Shimizu

- 
- ① pkg maintenance of torbrowser-launcher
 - ② I hope more infrastructure, such as build, ftp-master server can move to asia, or even japan! But how can local community help?

- ① gcc の pie オプションを調べて発表準備をする
- ② Please tell me popular sub project of debian. I dot't find sub project guide page in debian wiki.

- ① 未定
- ② (thinking...)

- 
- ① ドキュメント読み
 - ② The DPL may largely be entangled in daily business to keep the project going. Do you have a personal dream or vision on what Debian should be like in a distant future?

- 
- 1 Read the docs and setup the Debian openstack cloud image to my own “cloud”
 - 2 What are challenges of the Debian community?
 - 3 Do you have any expectations for Japanese user group?
 - 4 What technologies are you interested in, recently?

BurnDuck (nabaua)

- 1 tensorflow
- 2 how to update debian 9

はしもとまさ

- ① GPU 入りノート PC に Debian はインストールできるか？(をやってみるかも)
- ② How about in Yokohama ? (横浜の感想をぜひ。)

- ① 次の勉強会の資料作成
- ② Do you know the age bracket of Debian Developeres and Maintaineres ? (今開発者の年齢層はどうなっているか。)
- ③ Are young Debian Developeres and Maintaineres increasing ? (若い人は増えているのかどうか)

- 
- ① ディスカッション
 - ② What would you like to achieve in your DPL term?

re-think De-
bian release
cycle
